MEMO

To: FILE (Misc.) - IMPORT CAR SERVICE
From: Gene Pabst *GP*
Subject: Antifreeze Recycling
Date: January 29, 1996

On January 29, 1996 Karen Chandler and I went to Import Car Service (1901 S. Stewart) to check to see what they do with their used antifreeze. We talked to Dick Carp, Service Mgr., and he said that they have a recycler. He took us back to where it was and he informed us that he takes antifreeze from several garages in town. He stores the used antifreeze in a 55 gallon barrel. When the barrel is full he then uses his recycler to treat the antifreeze. Then he puts the antifreeze in another barrel. From there he uses it in the cars that he services. He stated that he gets antifreeze from Brentwood Conoco Service Center at 2208 S. Glenstone.
